

## *A History Of Wood Engraving*

### **A History Of Wood Engraving**

Wood engraving is a printmaking and letterpress printing technique, in which an artist works an image or matrix of images into a block of wood. Functionally a variety of woodcut, it uses relief printing, where the artist applies ink to the face of the block and prints using relatively low pressure. By contrast, ordinary engraving, like etching, uses a metal plate for the matrix, and is printed ...

Printmaking - History of printmaking: Engraving is one of the oldest art forms. Engraved designs have been found on prehistoric bones, stones, and cave walls. The technique of duplicating images goes back several thousand years to the Sumerians (c. 3000 bce), who engraved designs and cuneiform inscriptions on cylinder seals (usually made of stone), which, when rolled over soft clay tablets ...
