

## *Computer Security Management By Karen Anne Forcht*

### **Computer Security Management By Karen**

A computer is a machine that can be instructed to carry out sequences of arithmetic or logical operations automatically via computer programming. Modern computers have the ability to follow generalized sets of operations, called programs. These programs enable computers to perform an extremely wide range of tasks.

Mobile security, or more specifically mobile device security, has become increasingly important in mobile computing. Of particular concern is the security of personal and business information now stored on smartphones.. More and more users and businesses use smartphones to communicate, but also to plan and organize their users' work and also private life.
