Last October, more than a year into his \$787 billion stimulus program, President Obama concluded in a New York Times Magazine interview that "there's no such thing as shovel-ready projects." To learn why America can't build stuff quickly (or even slowly), Obama should take a rush-hour ride over the Tappan Zee Bridge, which connects Rockland and Westchester Counties over the Hudson ...

Framing, in construction, is the fitting together of pieces to give a structure support and shape. Framing materials are usually wood, engineered wood, or structural steel. The alternative to framed construction is generally called mass wall construction, where horizontal layers of stacked materials

such as log building, masonry, rammed earth, adobe, etc. are used without framing.

Patrick M. Ferrell, described as an independent scholar and self-identified as a land surveyor, read the Nature article with disbelief and then did what the authors of that piece—and, to be fair, most of their critics—failed to do. He obtained construction plans and a right-of-way map from San Diego Caltrans District 11 headquarters and correlated road construction with the reported ...
